Haripur, KPK, Pakistan

Objective

Motivated and detail-oriented Computer Science student with a solid foundation in MERN stack development and practical experience in technical support and full-stack web applications. Skilled in identifying and resolving complex issues, with a focus on delivering user-friendly, scalable solutions.

Proficient in modern development tools and best practices, including EJS templating, RESTful APIs, and deployment workflows. Known for strong communication, client handling, and a problem-solving mindset. Eager to contribute to a forward-thinking company like Fena, where I can grow and apply my skills to real-world challenges.

Education

BS Computer Science University of Haripur 4th Semester | CGPA: 3.5

Work Experience

Currently, I provide front-line support for software and website-related issues, ensuring quick and effective resolutions. I identify and troubleshoot technical bugs, collaborating closely with the development team to resolve them efficiently. I actively develop and maintain web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), while also ensuring smooth deployment processes and a high level of user satisfaction. In addition to MERN stack development, I manage WordPress-based projects and support junior developers when needed. My dedication and performance were recognized with the Employee of the Year – 2024 award.

Technical Skills

Languages/Frameworks: JavaScript, React.js, Node.js, Express.js, MongoDB, EJS

Front-end: HTML5, CSS3, Tailwind CSS, Bootstrap

Templating Engines: EJS

Tools: Git, GitHub, VS Code, Postman, Prettier.

Platforms: WordPress, cPanel

Core Skills: MERN Stack Development, Templating, Troubleshooting, Technical Support, Client Communication, Bug Fixing, Deployment, Version Control,

Certifications

- Sigma 3.0 – Apna College (Data Structures & Algorithms with Java + Full Stack Development with MERN) - Giga Developers Certificate (Full Stack Development & Technical Support) - Employee of the Year – 2024 award.

Projects

Doctor Appointment Booking System (MERN Stack) - Built a full-featured system with role-based authentication for patients, doctors, and admins.

- Integrated online payment and profile management functionalities.
- Suitable for hospitals and clinics.

Time Table Maker (MERN Stack)

- Designed for universities to auto-generate class/teacher schedules.
- Ensured no room or time clashes, with role-based access for admins, teachers, and students.

Employee Management System – Albert Abelia Catering (MERN Stack)

- Developed a system to track employees, manage attendance, and HR tasks.
- Tailored for use in UAE-based company operations.

Portfolio Projects

- Built responsive websites using WordPress and MERN for clients in Pakistan and the UAE.
- Focused on modern UI/UX and mobile responsiveness.

Landing Pages & One-Pagers (HTML/CSS/JS/Tailwind)

- Created responsive landing pages for product showcases and campaigns using HTML, Tailwind CSS, and JavaScript. Optimized for speed, SEO, and mobile compatibility.

Personal Portfolio (MERN Stack)

- Built a responsive and modern portfolio website to showcase projects, skills, and contact information. Includes a custom admin panel to manage content dynamically.

Blog Platform (Node.js + EJS)

- Developed an SEO-friendly blog platform with user authentication, post management, commenting system, and category-based filtering. Designed with a focus on performance
